(\$299 without the Promo Code)

Despite the excitement about this new frontier with big potential,
it also includes unique regulatory restrictions and liabilities for businesses.

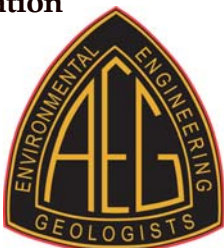

Instructor:
Tom Gemmell, JD

Commercial drone business is soaring. However many businesses are not properly insured and are unaware of the claims limitations related to some flight paths and locations. If you are considering incorporating drones into your business or hiring a drone operator for a project, there are virtually limitless choices for technologies, and virtually limitless risk possibilities too.

Register now and learn the critical legal aspects of owning or subcontracting drones.
